

**Amendments to the claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of claims:**

Claim 1 (currently amended): Pack comprising a body having a circumference which is at least approximately constant or decreases slightly along at least almost an entire length of the body, ~~comprising a removal opening and a filling opening, the body being tapered between a collar and a bottom section in one section by at least one a plurality of pleats extending along the length of the body from the collar to the bottom section.~~

Claim 2 (previously presented): Pack according to claim 1, wherein the body tapers conically over the length.

Claim 3 (previously presented): Pack according to claim 1, wherein the body is folded into a meander shape.

Claim 4 (previously presented): Pack according to claim 3, wherein the meander shape is only present in the conically tapered section of the body.

Claim 5 (currently amended): Pack according to claim 1, wherein the body is designed to be conical in ~~an area of an end~~ the bottom section of the body.

Claim 6 (currently amended): Pack according to claim 1, ~~wherein comprising a the collar that projects outwardly at an end of the pack.~~

Claim 7 (previously presented): Pack according to claim 1, wherein the pack is open at one end and is designed to permit closure by a lid.

Claim 8 (previously presented): Pack according to claim 7, wherein the lid is sealed to the body.

Claim 9 (previously presented): Pack according to claim 7, wherein the lid is glued to the body.

Claim 10 (previously presented): Pack according to claim 7, wherein the lid is fitted on the body.

Claim 11 (previously presented): Pack according to claim 7, wherein the lid has a predetermined rupture line.

Claim 12 (previously presented): Pack according to claim 7, wherein the lid is pressed into a space created by the body when the pack is being emptied.

Claim 13 (previously presented): Pack according to claim 1, wherein the removal opening is closed by a process selected from the group consisting of sealing and gluing.

Claim 14 (previously presented): Pack according to claim 1, wherein the removal opening is designed to have a specific shape.

Claim 15 (previously presented): Pack according to claim 1, wherein the removal opening is defined by a predetermined rupture line.

Claim 16 (previously presented): Pack according to claim 1, wherein the removal opening is designed to project.

Claim 17 (previously presented): Pack according to claim 1, wherein the removal opening is closed by a closure.

Claim 18 (previously presented): Pack according to claim 17, wherein the closure is glued to the body.

Claim 19 (previously presented): Pack according to claim 17, wherein the closure is designed in the form of a label.

Claim 20 (previously presented): Pack according to claim 1, wherein the body comprises a plastic.

Claim 21 (previously presented): Pack according to claim 20, wherein the body is manufactured by an injection moulding process.

Claim 22 (previously presented): Pack according to claim 20, wherein the body is produced by thermoforming.

Claim 23 (previously presented): Pack according to claim 1, wherein the body is wound from paper and is closed along a longitudinal seam.

Claim 24 (previously presented): Pack according to claim 1, wherein the removal opening has a shape that approximates a shape of a star.

Claim 25 (previously presented): Pack according to claim 1, wherein the body comprises a material selected from the group consisting of polypropylene and polyethylene.

Claim 26 (currently amended): A pack for free-flowing or pasty products comprising a body for receiving the product comprising a circumference which does not increase along its length, ~~having~~ a removal opening and a filling opening, the body comprising ~~at least one a plurality of~~ pleats extending along the length of the body from a collar to a bottom section.
